

Procurement Shared Services

Vendor Workshop

Procurement Shared Services (PSS) of the Department of Infrastructure (INF), is a branch of the Government of the Northwest Territories (GNWT) that administers and manages larger government procurements.

In order to better serve our vendors, PSS is hosting workshops for vendors and businesses introducing **new updates** to our eProcurement website and tips on bidding and doing business with the GNWT.

Topics being presented will include:

- New changes to the Contract Event Opportunities site;
- How to Do Business with the GNWT; and
- How to fill out BIP (Business Incentive Policy) forms to ensure you receive your full preference due when bidding on contracts.
